

## PHOTOGRAPHY LESSONS

Learn to take better photos amidst  
Verbier's spectacular natural setting

**FULL DAY OR HALF DAY**

## **MONT FORT DISCOVERY DAY - 7 HOURS (FULL DAY)**

Professional photographer, Sébastien Albert, will meet with you the evening before your photography day to ensure you're fully prepared for the day of tuition to come, and therefore make the most of your time spent together.

The day begins at 9 a.m. with a little over an hour spent indoors touching on the technical aspects of the day's lesson before heading outside where you will put theory into practice, exploring the photographic opportunities of the mountains. The day will consist of a blend of gentle walking on flat tracks and usage of the cable car system to access locations ideal for practicing and developing your photography skills with Sébastien's professional tips and guidance. The high point of the day will surely be the views from the top of Mt Fort, which at 3330 m provides a superb vantage point for the region as a whole.

The day finishes with some time spent in either a mountain or town restaurant where you can enjoy a drink or a meal whilst you discuss the photographic results of the day.

## **VERBIER PHOTO STROLL - 4 HOURS (HALF DAY)**

This half day lesson begins at 9 a.m., with time spent both indoors and outside. After going over some basic theory, you wander out into the beautiful resort of Verbier in search of photographic inspiration and focus on improving your photographic abilities by putting theory into practice. Sébastien will provide technical knowledge and guidance together with practical advice throughout the morning. This is a great option for those less than perfect weather days and for people who might be reluctant to venture into the mountains but are keen to improve their photography.

## PHOTO EQUIPMENT

The lessons are aimed at ensuring you learn how to make the most of the equipment you use on a regular basis. To take full advantage of Sébastien's expertise, a great set-up might be a Bridge camera, or a DSLR with zoom lenses covering the range between wide-angle to tele. However, those who use a compact digital camera are equally welcome, as these devices are full of useful and interesting features worth exploring. Learning how properly to use them will enable you to make the most of your camera. After all, as Sébastien says, the best camera is always the one you have with you when a photo opportunity arises, provided you know how to use it correctly!
